Please find below and/or attached an Office communication concerning this application or proceeding.

₩ ·	Application No.	Applicant(s)					
Advisory Action	09/773,598	HIRAI ET AL.					
navicely nearly	Examiner	Art Unit					
	Janet L Andres	1646					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address							
THE REPLY FILED 20 February 2003 FAILS TO PLACE THIS APPLICATION IN CONDITION FOR ALLOWANCE. Therefore, further action by the applicant is required to avoid abandonment of this application. A proper reply to a final rejection under 37 CFR 1.113 may only be either: (1) a timely filed amendment which places the application in condition for allowance; (2) a timely filed Notice of Appeal (with appeal fee); or (3) a timely filed Request for Continued Examination (RCE) in compliance with 37 CFR 1.114.							
PERIOD FOR REPLY [check either a) or b)]							
a) The period for reply expires 6 months from the mailing date of the final rejection. b) The period for reply expires on: (1) the mailing date of this Advisory Action, or (2) the date set forth in the final rejection, whichever is later. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of the final rejection. ONLY CHECK THIS BOX WHEN THE FIRST REPLY WAS FILED WITHIN TWO MONTHS OF THE FINAL REJECTION. See MPEP 706.07(f).  Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if imely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).							
1. A Notice of Appeal was filed on Appellant's Brief must be filed within the period set forth in 37 CFR 1.192(a), or any extension thereof (37 CFR 1.191(d)), to avoid dismissal of the appeal.							
2. The proposed amendment(s) will not be entered be							
(a) they raise new issues that would require further consideration and/or search (see NOTE below);							
(b)  they raise the issue of new matter (see Note below);							
(c) ☐ they are not deemed to place the application ir issues for appeal; and/or							
(d) they present additional claims without canceling a corresponding number of finally rejected claims.  NOTE:							
3. Applicant's reply has overcome the following rejection	on(s):						
4. Newly proposed or amended claim(s) would canceling the non-allowable claim(s).	be allowable if submitted in a se	parate, timely filed amendment					
5. The a) affidavit, b) exhibit, or c) request for reconsideration has been considered but does NOT place the application in condition for allowance because: See Continuation Sheet.							
<ol> <li>The affidavit or exhibit will NOT be considered becaraised by the Examiner in the final rejection.</li> </ol>	ause it is not directed SOLELY to	o issues which were newly					
7. For purposes of Appeal, the proposed amendments explanation of how the new or amended claims wo							
The status of the claim(s) is (or will be) as follows:							
Claim(s) allowed:							
Claim(s) objected to:							
Claim(s) rejected: <u>2-5</u> .							
Claim(s) withdrawn from consideration:							
8. The proposed drawing correction filed on is a	a)∏ approved or b)∏ disappi	roved by the Examiner.

Polant and Trademak Office							

Continuation of 5. does NOT place the application in condition for allowance because: Applicant argues that none of the cited patents teaches removal of TGF-beta without preliminary sample preparation and purification. Applicant argues that preliminary preparation and purification would remove large numbers of components and argues that one of ordinary skill would not expect successful removal without these steps. Applicant argues that the C4 column taught by Lucas generally has a log P of less than 2.5. Applicant concludes that there is no connection between the removal of TGF-beta from a purified material and no connection between removal or TGF-beta and a log P effect.

Applicant's arguments have been fully considered but have not been found to be persuasive. What is required for Applicant's invention is that TGF-beta bind to the adsorbent used and thus be removed from the sample. As stated in the previous office action, one of ordinary skill would know from the cited references that TGF-beta bound to hydrophobic columns. Purification of TGF-beta is not required and one of ordinary skill in the art of protein purification would expect that TGF-beta in an unpurified sample would interact with a hydrophobic adsorbent and thus be removed from the sample.

While the use of a C4 column is also taught, Lucas clearly teaches that TGF-beta binds to a C18 column in column 3, lines 63-67...
